

Investing into a diversified portfolio of VCT providers has historically been difficult to achieve and has come with the added burden of inefficient paper-driven applications, ongoing administration, and a subsequent lack of consolidated reporting on portfolio performance.

We provide a service to access a portfolio of high quality VCT providers, digitising the application and administration process, whilst providing you with granular online reporting incorporating tax reliefs, and real time performance analysis across your underlying VCT investments and consolidated portfolio.

We have partnered with GrowthInvest on our VCT offering, which is a technology driven platform designed to simplify research, investment and reporting on tax efficient and alternative investments providing you with choice, control and oversight through the provision of digital solutions.

“At Partners Wealth Management, finding robust innovative solutions that best serve our clients is at the heart of our ethos, and we are therefore delighted to be working with GrowthInvest as our chosen partner.”

James Roberts, Managing Partner

How it works

1. Open a GrowthInvest account

Speak to your PWM adviser and set up your own GrowthInvest account, which can be carried out either by an online or offline application. This account can be used for all alternative investments, incorporating both new and existing holdings. For more support, contact us on either info@partnerswealthmanagement.co.uk or 020 3961 5406.

2. Choose your VCTs

Working with your adviser, research and select the VCT(s) that you would like to invest in for this tax year. Your adviser will provide the relevant forms and any additional documentation required by the product provider(s) including ID checks.

3. Transfer Funds

Funds are typically transferred to a dedicated GrowthInvest client account (held with James Brearley, Crest nominee) and distributed to the relevant provider upon confirmation of the investment application being approved.

4. Login and review your portfolio

All investments will be held by GrowthInvest via secure third-party custodians, and dividends will typically flow into your client money bank account. Your VCT portfolio will be available to view in the secure online portal along with documentation including tax certificates. Just visit www.growthinvest.com and log in to get started.

VCTs in Practice

The benefits of investing into a VCT-qualifying company include:

30% Initial Income Tax Relief

Actual net cash outlay 70 pence in the £1

CGT Freedom

No Capital Gains Tax to pay

Tax Free Dividends

Dividends from your VCT shares are not subject to income tax

Invest £50,000 and get £15,000 income relief

This diagram shows how Laura can claim income tax relief from each VCT investment she makes across several consecutive tax years, whilst benefiting from tax free capital gains and dividends. To benefit from Income Tax Relief there is a requirement to hold VCT shares for at least five years and on disposal there is the ability to reinvest subject to certain restrictions.

Laura places a £50,000 investment in year one which allows her to claim £15,000 in tax relief.

She continues to invest an additional £50,000 into a VCT in years two, three, four and five, claiming income tax relief of £15,000 in tax each year.

In year six, Laura can choose to sell her first year's VCT investment, tax-free. By investing the proceeds of the sale into another VCT, which is assumed to be £50K for the purpose of this illustration, she is able to use her first year's investment to claim further income tax relief. After six years, Laura could have claimed **£90,000** in income tax relief from a **£250,000 investment**.

By reinvesting in subsequent years, Laura could continue to use this approach to claim tax relief each year, without having to invest more than her initial £250,000 stake of £50,000 per year over the first five years.

VCTs are high risk and not suitable for everyone. If an investor needs guaranteed income, cannot tolerate loss or is uncomfortable losing immediate access to their money, then VCTs are not suitable. Tax reliefs assume that the client is a high-rate tax payer and are based on HM Treasury rates as at October 2019.

Investing in start-ups and early stage businesses involves risks, including illiquidity, lack of dividends, loss of investment and dilution. It should be done only as part of a diversified portfolio. GrowthInvest investments are targeted exclusively at investors who understand the risks of investing in early stage businesses and can make their own investment decisions.
