Introduction

Over the last few years, it has become apparent that an ability to see your total asset allocation and performance instantly online is important to you and us so we can immediately view, control and if necessary, change the risk in your portfolio(s).

With clearer visibility, we are rapidly able to take action to reduce threat or seize opportunity as your approach to risk changes in accordance with the investment outlook and forecasts. The 7IM platform provides this functionality whilst many other investment platforms do not aggregate performance or asset allocation across your wrappers.

The 7IMagine for Partners Wealth Management app allows you to securely access your portfolio on any device of your choice at any time. It allows you to compare how investments are doing with a variety of market indices and other measures, it also lets you drill down into portfolios by geography, asset type and account. Furthermore, you can receive market and economic news and a wide choice of links to other news, opinion and lifestyle content.

If you have any questions or issues registering for the Online Portal and the app, please do not hesitate to contact your Partners Wealth Management adviser's team.
